

Exp2: MLP Layer-wise Ablation Analysis - 2D Heatmap Comparison

Exp2 Analysis Summary

- Each heatmap shows layer-wise MLP ablation effects
- Color intensity indicates MA value changes when a layer is disabled
- Critical layers show distinct patterns (typically one layer dominates MA generation)

Figure: Layer-wise ablation heatmaps for 7 LLM architectures. Each subplot shows the Massive Activation (MA) values when individual MLP layers are ablated. Darker/cooler colors indicate larger MA suppression.
